

Riana Minocher: **/eco\_minocher/EARS**

---

From now on, add the following processes to DIGGING!

For every **corresponding author**,

- find out their ***current email address(es)***
- find out their ***current academic title***

Sometimes, you will find more than one web page for the same author (e.g., if they are associated with more than one university).

You will have to use your investigative skills to determine the most up-to-date affiliation. :)

Enter the information into the yaml, accordingly.

Also, start to work through the already existing YAMLS.

Start with folder: **/eco\_minocher/EARS/5\_communication**

Afterwards, proceed with folder: **/eco\_minocher/EARS/4a\_temp\_comm**

--> once you are finished with a publication folder in 4a\_temp\_comm, move that publication folder to: **/eco\_minocher/EARS/5\_communication**
